PROFESSIONAL SUMMARY

Aspiring AI Engineer and Full Stack Developer with hands-on experience building LLM-powered assistants, multimodal AI systems, machine learning applications, and scalable backend services. Developed intelligent software featuring contextual memory, autonomous task execution, computer vision, predictive analytics, and real-time data processing. Proficient in Python, FastAPI, Flutter, SQL databases, and AI development workflows, with a strong interest in agentic AI, intelligent automation, and human-centered AI systems.

TECHNICAL SKILLS

Languages:	Python, Java, C++, JavaScript
Frontend:	Flutter (Dart), HTML, CSS
Backend:	FastAPI, REST API Design & Development
Databases:	MySQL, PostgreSQL, SQLite
Tools:	Git, GitHub, PyQt5
Concepts:	Data Structures & Algorithms, Offline-First Architecture, API Design, Basic Machine Learning, Compiler Design

WORK EXPERIENCE

Fiverr—Freelance

Jan 2026 – Present

Independent Full Stack Developer | Remote

- Developed and delivered Flutter + FastAPI applications for international clients, managing the full project lifecycle from requirement gathering to deployment.
- Implemented offline-first architecture with reliable background data synchronization, improving app reliability in low-connectivity environments.
- Provided ongoing post-launch support, performance optimization, and feature improvements based on client feedback.
- Maintained clear client communication throughout projects, consistently achieving on-time delivery.

KEY PROJECTS

ARIA—Adaptive Responsive Intelligent Assistant | Python · LangChain · Ollama · ChromaDB · OpenCV · MediaPipe · DeepFace · Whisper · PyQt6

Developed an adaptive AI desktop assistant that combines voice interaction, computer vision, gesture recognition, contextual memory, and autonomous task execution. Implemented multi-step reasoning, vector-based long-term memory, real-time screen understanding, emotion-aware adaptation, productivity analytics, and safety-governed automation using local LLMs and multimodal AI models to deliver a privacy-focused intelligent assistant.

Finura—AI-Powered Personal Finance Tracker | Flutter · FastAPI · SQLite · PostgreSQL · Machine Learning

Cross-platform mobile and web finance app featuring offline-first sync with background conflict resolution, ML-based expense prediction using historical spending patterns, and an AI chatbot for personalized financial insights. Designed and built the full backend REST API and integrated real-time data synchronization.

WiFi Strength Scanner & Heatmap Visualizer | Python · PyQt5 · SQLite · IDW Interpolation

Desktop tool that scans and visualizes WiFi signal strength across physical spaces using Inverse Distance Weighting (IDW) interpolation to render accurate coverage heatmaps. Stores scan history in a local SQLite database for trend analysis and comparison over time.

Wireless Morse Code Communication System | Arduino · C++ · NRF24L01+ RF Module

Hardware project implementing a wireless, bidirectional Morse code communication system using Arduino microcontrollers and NRF24L01+ radio modules. Built real-time encoder/decoder logic enabling two-way communication across a 100+ meter range without internet connectivity.

MINI-Compiler for Custom Language | Python · C++

Designed and implemented a complete compiler pipeline for a custom programming language, including a lexer (tokenizer), recursive-descent parser, semantic analyzer, and a type-safe execution engine with memory safety enforcement.

EDUCATION

Daffodil International University

2022 – Dec 2026 (Expected)

B.Sc. in Computer Science & Engineering | Dhaka, Bangladesh

Current CGPA: 3.36 / 4.00

Kushtia Central Government College

2021

Higher Secondary Certificate (HSC) | Kushtia, Bangladesh

GPA: 4.66 / 5.00

Halsa High School

2019

Secondary School Certificate (SSC) | Kushtia, Bangladesh

GPA: 5.00 / 5.00

LANGUAGES

Bengali (native), **English** (professional working proficiency), **Urdu** (basic), and **Hindi** (basic).
